Game Development

Deep Sear Survivor

Created a 2D underwater survival game using the Unity Engine with my team. The features of

the game include: - Fish follow AI - Full underwater controls - Boss Battles

Shoot Pump Shoot

A 3D speed runner game made using the Unity Engine with my team. The game features including:-
Simple speed running mechanics - Fast and difficult AI - Box art Unity Assets were used to make this
game.

Peekaboo Hide and Seek Game

We have created an online multi-player game. We were responsible for networking, spawning

players, multiplayer game control, player control and digital products. All the art-work as provided

by the client.

EZE Run

A simple balancing game made using the Unity Engine with my team. All assets were createdin

house. The features are: - Simple balancing game - High speed racing - High res 2D graphics

Super Box Adventures

A 2D game based on classic old-school 2D side scrolling mechanics. Made using the Unity Engine with my team. the game includes: - 50 levels - Life mechanic - Smart Enemies - Environment puzzles- Environment Hazards

Pixel Wars

A boss rush game inspired by flash games of the past. Made using the Unity Engine with my team.

Features include: - 6 unique boss battles - Extremely difficult boss fight patterns - Endless

challenge system

Buckets - Multiplayer Runner

Wrote scripts using Unity Engine with the PUN Plugin to achieve multiplayer lobby functionality. - Repurposed single player scripts to load character properly for both local and foreign clients. - Wrote multi-player difficulty logic to work with multi-player system - Wrote script to help synchronize variables across all clients

Midnight Zombie Marathon

This is a card game. I wrote the C# scripts required for the game to function and also added the features that the client required in the Unity Editor. The Graphics were provided by the client.
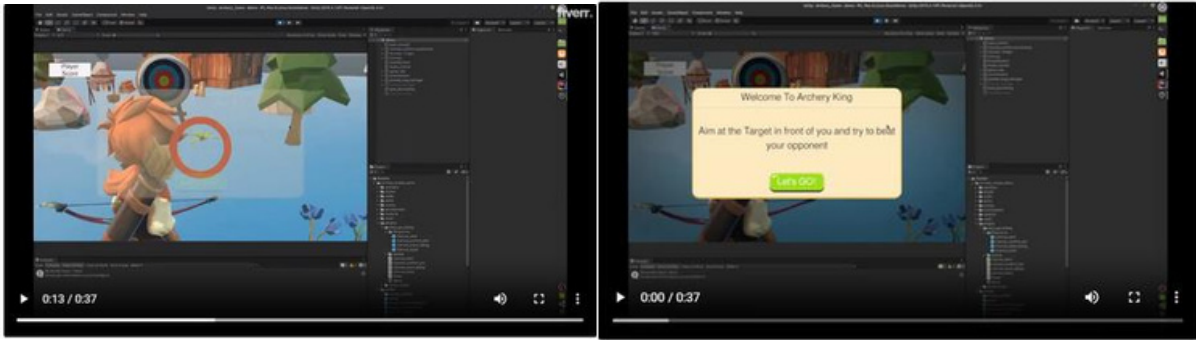

Archery Game - Shooting Mechanic

– Created an arrow shooting mechanic based on asset client provided - Remapped controls to make it work for controller - Create a brand-new scoring system for archer hits - Created logic for arrow sticking into target - Created a new third-person view as required by client.

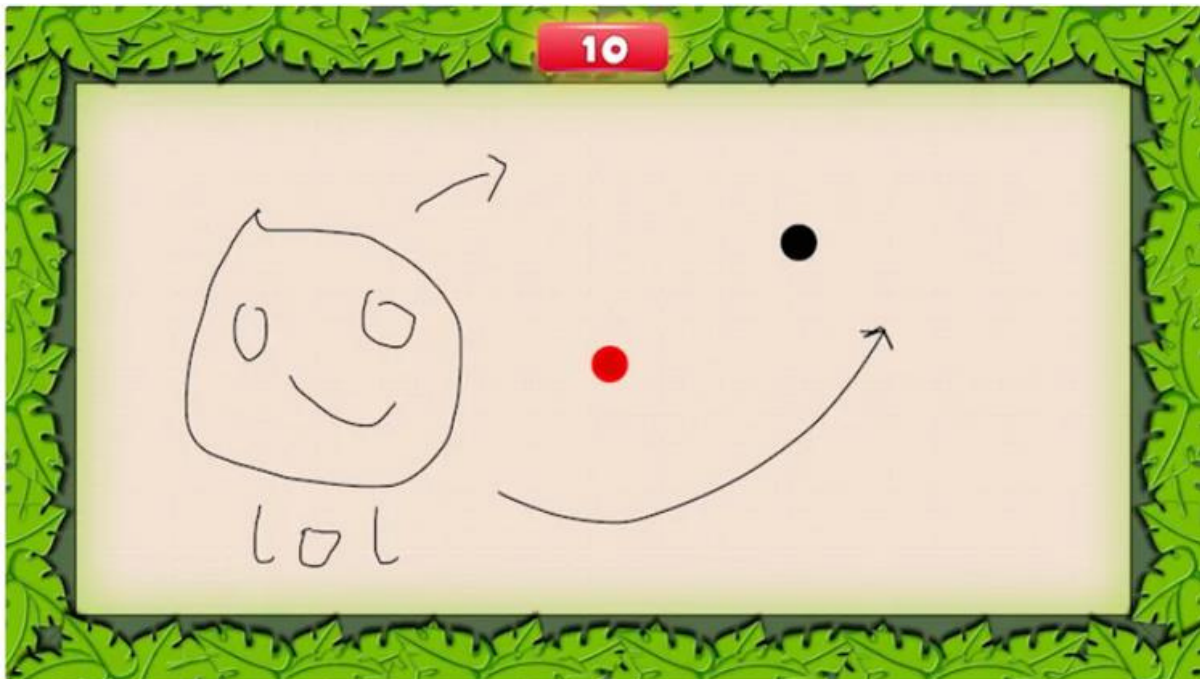

Bindi Go We created: -

The graphics for the game - The complete system for line generation through touch - The ball physics system - The level colliders and design of the hole through which the ball passes through - The level unlocking system - The level complete system.
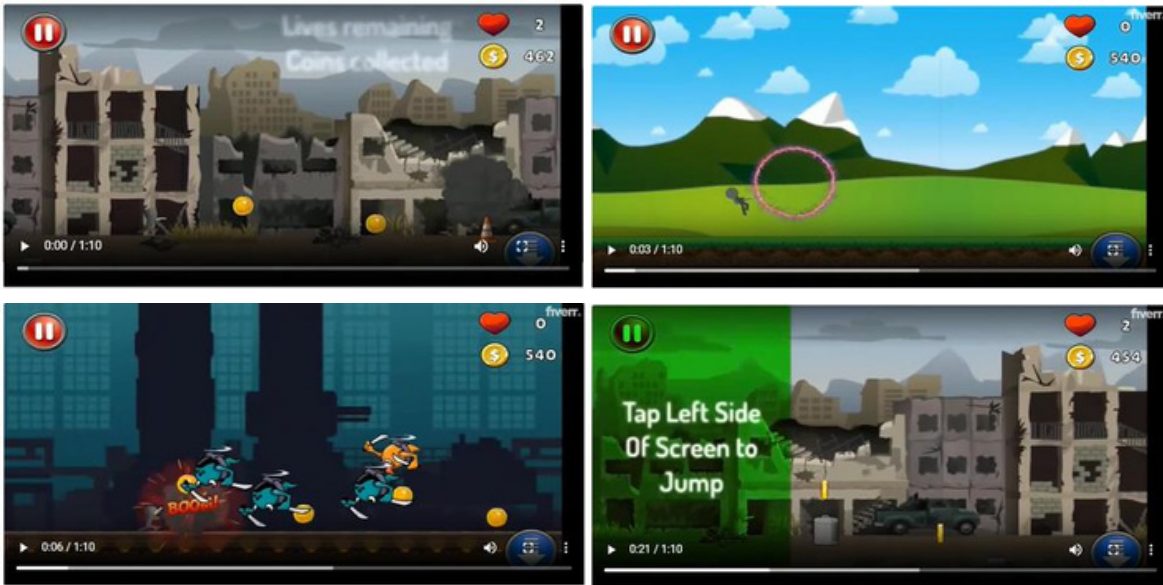

Big Head Slide 2

We created the complete endless side-scrolling system - The portal system to change levels - The system that lets the player shoot enemies - Enemy AI, including laser shooting - Endless scoring system - Melee system for enemies - Revive system - Ad system including revive system through ads - Weapons shop
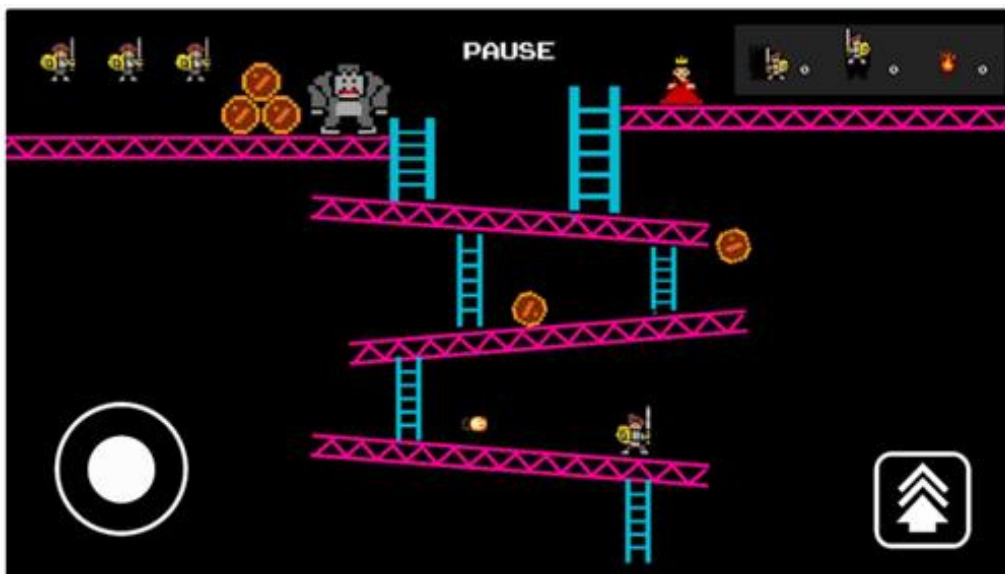

Lucio Kong

Inspired by the old school Donkey Kong Game! You have to climb to the top of the ladder to save the princess! This game was programmed by us and another service provider did all the graphics for it.
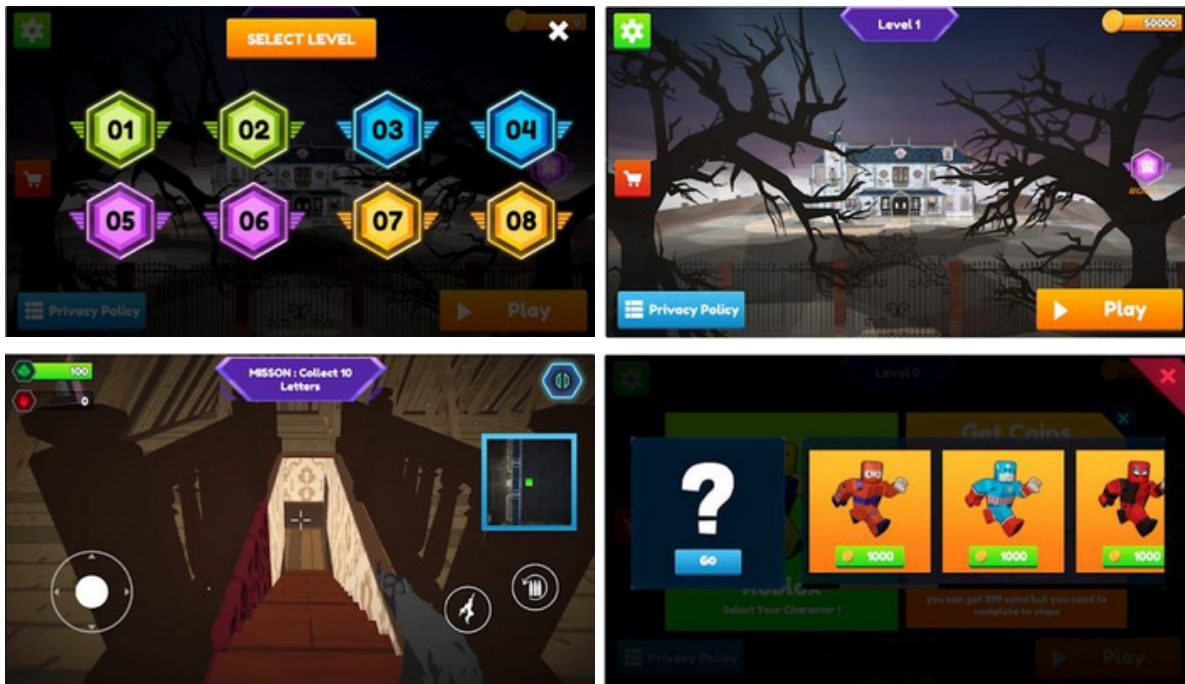

Horror game Unity Android
